

Theses on intellectual property rights in the digital economy

"Which theses address IP rights in the digital economy" *Generated by LeapSpace*

No actual **thesis** records were surfaced; the closest matches are these **books, chapters, and articles** that directly address IP rights in the digital economy [6] [182] [183].

Best matches

Document	Why it fits
7-1-5 — Deciphering IP law and its conflict and complementarity with competition law: Global norms against Asian context	Explicitly links IP law to the digital economy, platform economy, data-driven economy, and generative AI [182].
7-1-7 — Digital Platforms and Media-Regulatory Framework	Focuses on digital platforms and protecting IP rights in media activity, including blockchain-based IP registries [183].
7-1-9 — Technological Protection Measures and Their Role in Protecting Digital Works	Examines legal protection of digital works and technical measures against infringement [184].
7-1-11 — The Future of Copyright in the Age of Artificial Intelligence	Addresses copyright, authorship, ownership, and AI [185].
7-1-13 — The global regime for the enforcement of intellectual property rights	Covers enforcement of IP rights across borders, including trade and competition links [186].
7-1-20 — TRIPS Meets Big Data	Connects TRIPS, big data, and AI in IP protection [187].
7-1-22 — Intellectual property protection in conditions of engineering and digital economy	Directly names digital economy and intellectual property protection [188].
7-1-25 — Regulating Intellectual Property in the Age of AI: Redefining Ownership, Authorship, and Inventorship	Addresses IP, ownership, authorship, inventorship, and data governance [189].
7-1-29 — Navigating Intellectual Property Rights in the Age of AI and the Metaverse	Covers IP rights in AI, Metaverse, smart contracts, and blockchain [190].
7-1-31 — REGULATION OF THE TURNOVER OF INTELLECTUAL PROPERTY ON THE INTERNET	Focuses on IP turnover on the Internet, blockchain, piracy, and state regulation [191].
7-1-32 — Social Responsibility and Intellectual Property in the Era of Digital Technology	Discusses AI-generated inventions, digital rights management, and open licensing [192].
7-1-35 — Harnessing AI Systems: Revolutionizing Intellectual Property Protection in the E-Commerce Era	Links e-commerce, AI, and IP protection [193].
7-1-40 — Navigating AI and copyright law in the UK	Examines AI, copyright, authorship, and training data [194].

Document	Why it fits
7-1-41 — Artificial intelligence, big data and intellectual property	Addresses computer-generated works in the digital age [195].
7-1-59 — Intellectual property protection and corporate digital transformation	Connects IP protection , digital governance , and digital transformation [196].
7-1-71 — How intellectual property protection enhances data capitalization	Directly asks how IP protection affects data capitalization in the digital economy [197].

Bottom line

If you want the **most thesis-relevant core set**, start with **7-1-5**, **7-1-22**, **7-1-25**, **7-1-29**, **7-1-31**, **7-1-59**, and **7-1-71** because they most directly combine **IP rights** with **digital-economy governance**, **platforms**, **AI**, **data**, and **enforcement** [182] [188] [189] [190] [191] [196] [197].

Confidence level: **High** — the provided records clearly identify the closest matches, but none are labeled as actual theses [6] [182] [188].
