

CHAPTER IV

Acceleration of the Commercialization and Utilization of IPRs

- 01 Special Action to Promote Patent Commercialization
- 02 Optimizing the Service System for IP Operations
- 03 Service for Boosting Development of the Industries
- 04 Growing the IP Service Sector

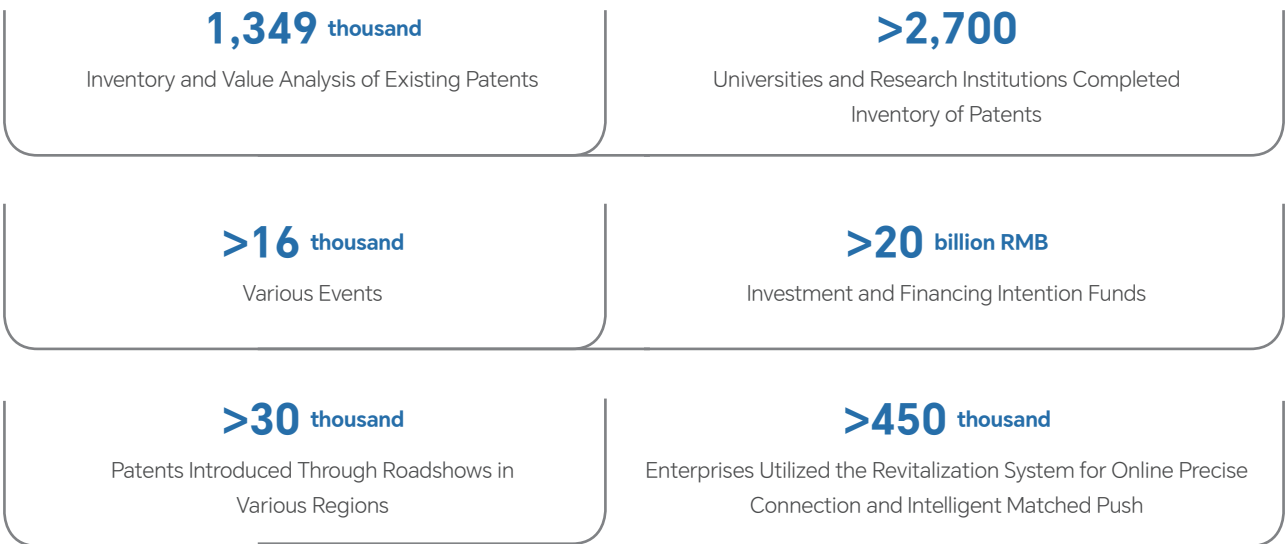

01 Special Action to Promote Patent Commercialization

The establishment of a special action promotion mechanism for patent commercialization and utilization composed of 22 departments was promoted, and more than 50 relevant policy documents were formulated and issued. CNIPA completed the inventory and value analysis of 1.349 million existing patents in universities and research institutions across the country for the first time, and organized precise connection and matched push with 450 thousand innovative enterprises. The “Intellectual Property Service Journey” campaign was launched, with a total of over 16 thousand events held across the country. More than 200 thousand enterprises participated in the events, over 30 thousand patents were introduced, and over 20 thousand patents were successfully commercialized and implemented or got intentions reached. A total of 282 projects were signed in nine cross-regional commercialization and connection events, involving 879 patents, with a contract value of 460 million RMB.

The number of patent assignment and licensing across the country reached 613 thousand throughout the year, a year-on-year increase of 29.9%. CNIPA, jointly with relevant departments, implemented the plan for the industrialization of patents to promote the growth of small and medium-sized enterprises. CNIPA guided the Patent Protection Association of China to identify 3,197 patent-intensive products as the second batch, involving 2,238 enterprises, with an annual output value of approximately 942.1 billion RMB.

The full implementation of the patent open licensing was promoted. More than 15 thousand patents have been declared and nearly 8,200 open licenses have been reached. The top ten cases of patent industrialization and the top ten cases of service institutions promoting patent industrialization were released to enhance the awareness of patent commercialization throughout society.

02 Optimizing the Service System for IP Operations

The service system for IP operations was continuously improved, a total of 13 national IP operation service platforms were guided to enhance their functional characteristics, and support was provided in the construction of a national IP operation (Hetao Shenzhen) international commercialization pilot platform. The functional roles of the patent industrialization navigation service base and the industry IP operation center were given full play to provide service support for IP operations. The effectiveness of IP financial services was enhanced, and the construction of comprehensive ecological pilot zones for IP finance in key regions was studied jointly with the National Financial Regulatory Administration.

CNIPA, jointly with the National Administration of Financial Regulation (NAFR), issued the *Notice on Fully Implementing Paperless Processing of the Entire Process of Intellectual Property Pledge Registration in Banking Financial Institutions* to promote the paperless processing of the entire process of

intellectual property pledge registration. In 2024, the patent and trademark pledged financing benefited 44 thousand enterprises, a year-on-year increase of 19.8%, in which inclusive loans benefited 34 thousand enterprises, accounting for 77.6% of the total number of the benefited enterprises, a year-on-year growth of 34.8%.

CNIPA, jointly with the National Administration of Financial Regulation (NAFR) and the National Development and Reform Commission (NDRC), selected and issued the second batch of typical cases of IP pledged financing, took innovative evaluation modes for patents and trademarks, supported the China Construction Bank in developing evaluation models and tools, conducted internal evaluation pilot projects for over 10 thousand intellectual property rights in 16 branches to enhance the evaluation capability of the bank, and exempted enterprises from evaluation fees to reduce financing costs.

03 Service for Boosting Development of the Industries

CNIPA continued to strengthen the cultivation of trademark brands and participated in holding the China Brand Day events. CNIPA stepped up the implementation of the “1000 Enterprises + 100 Cities” action to increase the value of trademark brands, organized and carried out research on the evaluation of the transaction price of trademark brands, and promoted the establishment of over 5,100 units offering guidance on trademarks and branding, providing services to business entities more than 600 thousand times. For five consecutive years, the China Trademark and Brand Development Index was compiled under the guidance of CNIPA.

CNIPA deepened intellectual property cooperation under the “Belt and Road” Initiative, released a list of 102 inclusive green patent technologies under the “Belt and Road” Initiative for the first time, encouraged the open IP implementation of international green technology, completed the promotion action for geographical indication brands under the “Belt and Road” Initiative, and released a list of the promoted geographical indication brands under the “Belt and Road” Initiative, covering 99 domestic geographical indications.

04 Growing the IP Service Sector

A healthy competitive environment was created for the agency industry. CNIPA, jointly with the Ministry of Finance, formulated and issued the *Government Procurement Demand Standard for Patent and Trademark Agency Service* to enhance the quality orientation of agency service procurement. Model texts for patent and trademark agency entrustment contracts and signing guidelines were issued, and guidance was provided for patent and trademark industry associations to formulate a list of prohibited business practices in patent and trademark agency.

A total of 886 patent agencies were approved and established, and the establishment of a resident representative office of one foreign patent agency in China was approved. The 2024 Patent Attorney Qualification Examination was held, with 56,276 applicants, 38,221 participants, and 6,356 people passing the examination.

Supervision over the IP agency was tightened up, and the “Blue Sky” special action was carried out to further improve the cross-regional collaborative supervision mechanism. The

quality monitoring mechanism and “triggered” supervision mechanism for patent and trademark agency were established and improved, and centralized verification of patent agents practicing with abnormal identity information was organized in various regions. Pilot management of credit evaluation on trademark agencies was carried out in five provinces, and the credit evaluation results of 6,646 trademark agencies and 10,597 trademark agency practitioners were released for the first time.

CNIPA accelerated the construction of intellectual property service clusters and guided 25 demonstration zones and pilot zones for developing high-quality IP service industry clusters to formulate construction plans. The *Statistical Report on the Intellectual Property Service Industry Nationwide 2024* and the *National Intellectual Property Agency Industry Development Status (2023)* were released. There are 89 thousand intellectual property service institutions across the country, with 984 thousand employees and an operating income exceeding 285 billion RMB.
