CHAPTER VIII

IP Foundation Building

01 Publicity and Media

02 Talent Training

01 Publicity and Media

1.1 Publicity of major events in 2024

In-depth publicity and reporting were carried out on nearly 10 major events such as the Third Belt and Road High-Level Conference on Intellectual Property; 3 special reports were organized and conducted on patent commercialization and utilization, and IP protection for foreign-funded and private enterprises; and the book

From Laboratory to Industrial Chain – 100 Cases of Patent Commercialization and Utilization Empowering New Productive Forces was compiled and published. The 2024 National Intellectual Property Publicity Week activities were held innovatively.

The State Council Information Office (SCIO) Press Conference on China's Intellectual Property Rights Development of 2023

1.2 Publicity of major IP news

New achievements in news release

A total of 12 monthly regular press conferences were held. 3 press conferences were held at the State Council Information Office on major themes such as China's intellectual property rights development of 2023. The brand image of the "Intellectual Property Press Conference Local Tour" campaign was strengthened by holding events such as the Press Conference Central Tour and Western Tour jointly with 6 provinces in the

central part and western part of China respectively. Journalists were organized to conduct in-depth interviews at 29 enterprises in 4 provinces (municipalities) including Henan, Hubei, Shaanxi, and Chongqing. The typical cases of administrative IP protection, the 10 major cases of patent reexamination and invalidation, and the typical cases of trademark opposition reviews in 2023 were released.

Breakthroughs in cooperation with the media

The major reports and publications in cooperation with the media throughout the year include: 17 news reports by the China Central Television (CCTV) “News Broadcast” program and 2 special reports by the CCTV “Weekly Quality Report” Program; 4 articles published on the front page of the *People’s Daily*; and an exclusive interview article with Commissioner Shen Changyu published by the Xinhua News Agency and an article by Commissioner

Shen Changyu published on the *Qiushi Journal*, both of which were widely reprinted. The *Financial Times* of the UK conducted an exclusive interview with Commissioner Shen Changyu and published an article. The production for the second episode of the short video “Intellectual Property Culture Around Us” has begun, which will be available in both Chinese and English.

Comprehensive interaction with local IP management institutions

10 regional venues were set up for the National Intellectual Property Publicity Week activities. Since the launch of the “Press Conference Local Tour” campaign in 2023, a total of 24 provinces, autonomous regions and municipalities have successively participated in the themed press conferences of the campaign. The “Special

Local Edition” of the official WeChat account and the “Local Dynamics” column of CNIPA’s official website were constantly optimized, which collected nearly 2,000 materials including brief reports, local news, report articles, and short videos from various regions.

1.3 Stepping up efforts in cultivating IP publicity talents

A training workshop on IP news publicity was held for more than 120 relevant staff members.

The popularization of IP education in primary and secondary schools has been continuously enhanced. National IP education training sessions were held for primary and secondary schools. Online IP training sessions were offered to teachers of primary and

secondary schools on the distance education platform, with more than 600 trainees throughout the year. Meanwhile, nearly 60 interesting and practical lectures were developed and launched on the non-profit account for the popularization of science at bilibili.com.

02 Talent Training

2.1 Nurturing IP talents nationwide

China IP Distance Education Platform saw 229,000 new registrations and provided training to 400,000 participants throughout the year, representing year-on-year growth of 12.3%; 7 new branches were established,

bringing the total number of distance teaching sub-platforms nationwide to 27, and the number of local, university, and enterprise branches to more than 260; and more than 150 new courses (with over 300 lecture

hours) were introduced, bringing the total number of online courses released to more than 900.

CNIPA held 5 senior seminars under the framework of the National Knowledge Renewal Project for Professional and Technical Talents, supported the Xizang Autonomous Region in organizing 5 training sessions and the National Intellectual Property Training Base in organizing 9 training sessions, and guided the Practice Base of the China Intellectual Property Training Center in holding over 20 training sessions and 15 special lectures. The production of “Trademark Premium Courses” comprising 64 lecture hours were completed, and a training platform was developed for professional competency assessment and learning enhancement in the field of trademark

substantive examination, with over 40 courses launched online.

10 practical training sessions on patent information were held for various intellectual property information service institutions. The 2024 Training Workshop for Technology and Innovation Support Centers (TISCs) was held. The 2024 Patent Information Training Seminar was held in Beijing on the theme of “Patent Information Facilitating the Commercialization and Utilization of Patents in Universities and Research Institutions”, participated by 40 representatives from patent information service institutions in 31 provinces (autonomous regions and municipalities) nationwide.

Promoting the development of degree programs in IP

CNIPA established the norms and standards for the education of postgraduate students specializing in IP. 25 universities established new degree programs in IP, bringing the total number of universities offering such programs nationwide to 27. The planned enrollment of these programs for 2025 reached over 400 students

in total, and the first batch of postgraduate students officially enrolled in IP degree programs. An international IP college was established jointly with Tsinghua University, and the joint establishment of another international IP college in the Guangdong-Hong Kong-Macao Greater Bay Area was under exploration.

Well-planned national IP talent training

The *National Training Plan for Intellectual Property Talent Capacity Building in 2024* was issued. A total of 74 IP training sessions were held at all levels for more than 14,000 trainees, focusing on key aspects such as IP

powerhouse construction, IP protection system building, and IP empowering new quality productive forces, as well as cutting-edge fields including artificial intelligence (AI), traditional Chinese medicine, and data.

Vigorous development of premium IP courses

25 online courses were produced on themes such as IP judicial protection system and practice, theoretical exploration and practice of data IP system, etc. Since the

start of the 14th Five-Year Plan, 139 premium courses have been developed with a total of 285.5 lecture hours.

2.2 Training programs

Solid and orderly talent training of CNIPA workforce

Professional and technical training programs were held for patent examiners. A total of 42 practice teams and 264 examiners were sent to the practice bases for training programs throughout the year.

Significantly enhanced efficiency of talent cultivation

Part-time technical investigation officers were selected to participate in the handling of intellectual property cases. Further guidance and support were provided for the patent examination cooperation centers outside Beijing, with 31 training instructors and 30 teaching instructors selected to work in those centers and 177 backbone tutors cultivated in various fields.

2.3 Foreign-related training programs

7 foreign-related training courses were developed, including the *Practice and Development of the PCT System in China*, and 46 foreign-related training courses

were revised, including *China's National Intellectual Property Strategy*.
