

Viet Nam ranking in the Global Innovation Index 2025

Viet Nam ranks **44th** among the 139 economies featured in the GII 2025.

The Global Innovation Index (GI) ranks world economies according to their innovation capabilities. Consisting of roughly 80 indicators, grouped into innovation inputs and outputs, the GI aims to capture the multi-dimensional facets of innovation.

Viet Nam ranks **2nd** among the 37 Lower middle-income group economies.

Viet Nam ranks **9th** among the 17 economies in South East Asia, East Asia, and Oceania.

> Viet Nam GII Ranking (2020-2025)

The table shows the rankings of Viet Nam over the past six years. Data availability and changes to the GII model framework influence year-on-year comparisons of the GII rankings. The statistical confidence interval for the ranking of Viet Nam in the GII 2025 is between ranks 41 and 45.

Year	GI Position	Innovation Inputs	Innovation Outputs
2020	42nd	62nd	38th
2021	44th	60th	38th
2022	48th	59th	41st
2023	46th	57th	40th
2024	44th	53rd	36th
2025	44th	50th	37th

Viet Nam performs better in innovation outputs than innovation inputs in 2025.

This year Viet Nam ranks 50th in innovation inputs. This position is higher than last year.

Viet Nam ranks 37th in innovation outputs. This position is lower than last year.

Viet Nam has no clusters in the world's top innovation clusters of the Global Innovation Index.

Notes: Not all indicators of the Global Innovation Tracker are used to calculate the Global Innovation Index. Long-term annual growth refers to the compound annual growth rate (CAGR) over the indicated period. For each variable, a one-year growth rate is set for the short run, and ten-year CAGR is set for the long run; time windows might differ when gaps exist in data availability. The end period corresponds to the most recent available observation, which may differ among countries. Temperature change is an exception: it indicates the change in degrees Celsius with respect to the average temperature in the countries. from 1951–1980. Figures are rounded.

Global Innovation Index 2025

Expected vs. Observed Innovation Performance

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

Relative to GDP Viet Nam performs above expectations for its level of development.

> Innovation overperformers relative to their economic development

Global Innovation Index 2025

Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

Viet Nam produces more innovation outputs relative to its level of innovation investments.

Overview of Viet Nam's rankings in the seven areas of the GII in 2025

The chart shows the ranking for each of the seven areas that the GII comprises. The strongest areas for Viet Nam are those that rank above the GII (shown in blue) and the weakest are those that rank below.

Highest Rankings

Viet Nam ranks highest in Creative outputs (34th), Knowledge and technology outputs (39th) and Market sophistication (43rd).

Lowest Rankings

Viet Nam ranks lowest in Human capital and research (70th), Institutions (59th) and Infrastructure (56th).

Global Innovation Index 2025

About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.
- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 140 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a "tool for action" for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research infrastructure, credit, investment, linkages, the creation, absorption and diffusion of knowledge and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
