Introduction

I am pleased to present our second Shopee Brand Protection Annual Report. In this 2023 edition, we reaffirm our ongoing commitment to ensuring a safe and reliable marketplace for all customers, sellers, and brand owners. Our actions and results demonstrate how we live this commitment as a company.

At Shopee, we believe that respect for Intellectual Property Rights (IPR) and preserving customer trust are non-negotiable cornerstones of a successful online marketplace. We unequivocally denounce the sale of infringing goods on our platform and work hand-in-hand with our partners to combat this.

In 2023, we elevated our Brand Protection program to new heights. Our dedicated team has launched numerous impactful initiatives to support rights holders. These programs have helped enhance our proactive response and build trust among our brand partners.

Throughout the year, we focused on three main areas:

- 1 Enhancing proactive measures
- 2 Forging brand partnerships against malicious actors
- 3 Engaging in industry-wide education

Key initiatives included launching our Smart Identification System (SIS) to preemptively detect counterfeit listings and reinforcing Seller Know Your Customer (KYC) protocols to deter unethical sellers on Shopee platforms.

We expanded accessibility to our Brand IP Portal globally, continuously improving user

experience and adding new functionalities. We also strengthened our partnerships with PSI and React members, fostering greater industry collaboration.

Through our efforts, Shopee engaged with over 1,000 brands, onboarded over 15,000 users to our Brand IP Portal, developed 24 new AI models, and doubled the number of seller accounts frozen for IPR violations compared to the previous year.

We have made great strides in a short period of time. However, our work is far from completion, and we will continue to improve and innovate as we further strengthen brand trust and enhance the user experience for our customers.

As always, we welcome and value constructive feedback and support from brands and our stakeholder community as we continue to serve you.

In 2024, we are committed to delivering an exceptional shopping experience for sellers and consumers while prioritizing brand protection.

We will continue to leverage new technologies to enhance proactive safeguards within the Shopee app, improve accessibility, and enrich features on our Brand IP Portal. The Brand Protection Partnership (BPP) program will be expanded to encompass more brands, and we will continue deepening engagement within the ecosystem through Online-to-Offline (O2O) programs, industry alliances, and collaborations with law enforcement.

We look forward to sharing more about these new initiatives and how they will continue to enhance our brand protection efforts.

A stylized black ink signature of Junjie Zhou.

Chief Commercial Officer
Shopee

Our Brand Protection Strategy

1

Fortified Proactive Safeguards

Developing technology-driven safeguards for proactive prevention and identification

2

Brand Support and Partnership Against Bad Actors

Taking swift action against bad actors through brand support and partnerships

3

Industry Engagement and Community Education

Strengthening ties with industry partners and promoting community awareness

Reinforcing our commitment to combating IP infringement comprehensively and efficiently, Shopee continues to prioritize developing impactful initiatives that protect and uphold IPR. We actively collaborate extensively with essential stakeholders in IPR protection while fostering robust cross-departmental cooperation within our organization.

We collaborate closely with rights holders, partners, industry associations, law enforcement, and regulators to develop innovative brand protection measures.

Through continuous innovation, we enhance our ability to detect and prevent counterfeit products and hold wrongdoers accountable.

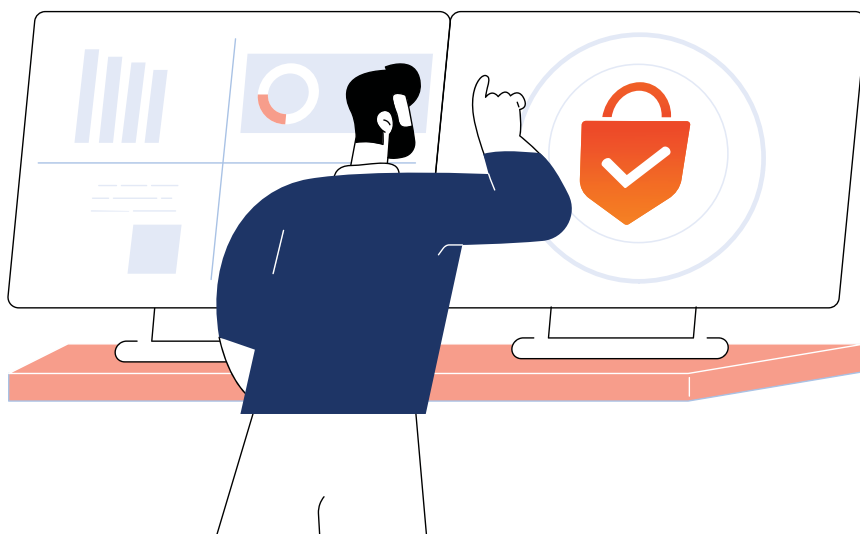

Fortified Proactive Safeguards

SECTION 01

- 1.1 | Smart Identification System (SIS)
- 1.2 | Enhanced Seller KYC Processes
- 1.3 | Seller Penalty Points

SECTION 01

Fortified Proactive Safeguards

2023

- **We pioneered an AI-powered Smart Identification System (SIS)** to identify instances of IP infringements proactively.
- **We strengthened our seller KYC (Know Your Customer)** processes across markets to reduce the risk of potential counterfeiting, fraud, and abuse.
- Through a **tightened seller penalty point system**, we doubled the number of seller accounts frozen for IP violations compared to 2022.

In our aim to ensure a safe and secure platform for all users, Shopee prioritizes a seamless account setup for legitimate sellers, by streamlining the seller registration process and implementing stringent verification measures, while implementing rigorous safeguards to mitigate risks and thwart malicious actors.

We utilize advanced proprietary systems, including AI and machine learning tools, to prevent the sale of infringing items. Enhanced by stringent seller verification and penalty systems, we ensure that Shopee remains a reliable and trustworthy marketplace for all users.

SECTION 1.1

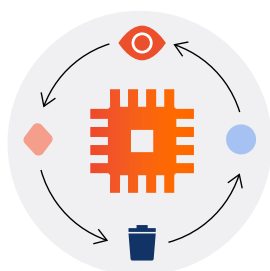

Smart Identification System (SIS)

Our Smart Identification System (SIS) combines Shopee's advanced technology with the extensive knowledge of our brand partners in IP management and counterfeit detection. Introduced in 2023 with our pilot brand partners, this system demonstrates the importance of collaboration in boosting protection against possible IP violations more effectively.

The SIS harnesses machine learning models powered by Natural Language Processing and Image Detection Capabilities, enabling more precise detection of potential trademark infringements within brand listings on our platform. Engineered to adapt to emerging infringement trends and simultaneously address a wide range of criteria, our SIS ensures swift and effective identification and response to infringements, reinforcing our commitment to brand protection and integrity.

Within its initial 30 days of operation, the SIS proactively removed **7.9 times more** listings than those that had been reactively reported by pilot brand partners

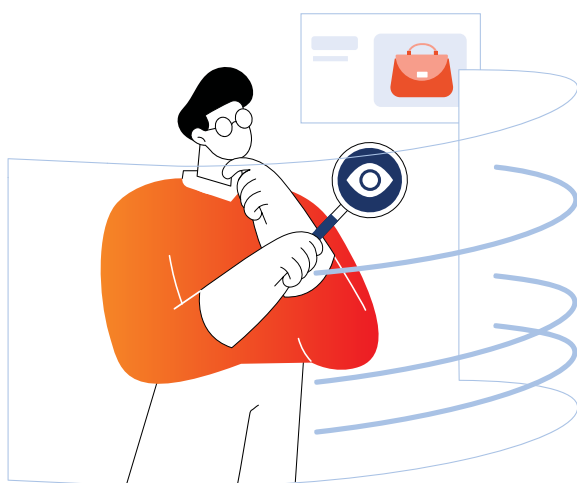

Since its launch, we have developed and successfully implemented 24 AI models within the SIS, evaluating **more than 50 million** listings each month

How It Works

Building our AI models

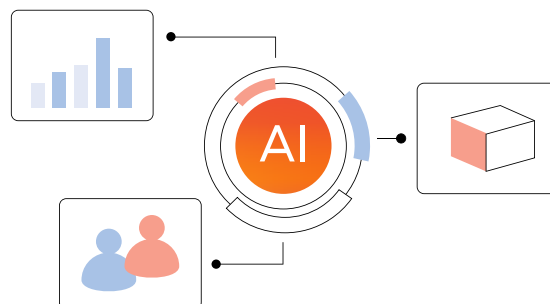

Shopee collaborates with brand partners to collect data on infringing products and maintains an archive of past IPR reports to train our models.

Evaluating effectiveness

To ensure continual improvement of the SIS, Shopee annotates the model output to verify precision and updates AI models accordingly through iterative processes.

1

2

Identifying infringements

The SIS integrates two essential AI models – a Multilingual Text Model and an image-based Brand and Trademark Detection Model, which adeptly analyzes listing names, product descriptions, and brand logo images.

This holistic approach ensures a thorough review of listings, detecting potential infringements that may bypass the image model or be mistakenly labeled as false positives.

3

In 2024, we aim to further enhance the SIS to broaden its use across more brands, detect counterfeit items on a larger scale, and increase operational efficiency.

SECTION 1.2

Enhanced Seller KYC Processes

Know Your Customer (KYC) processes serve as a crucial tool in mitigating the risks associated with IP infringement. As a pivotal part of our comprehensive brand protection strategy, we enhanced our seller KYC process across markets in 2023 to verify potential sellers' identities. The updated process aims to create a secure environment for sellers while guarding against bad actors and illicit products within our community.

Shopee combines industry-leading tools with robust engineering practices to develop KYC solutions that prioritize quality, efficiency, and reliability. This approach bolsters our ability to authenticate sellers and effectively combats the spread of counterfeit goods, thus reinforcing the protection of brand IPR throughout our platform.

SECTION 1.3

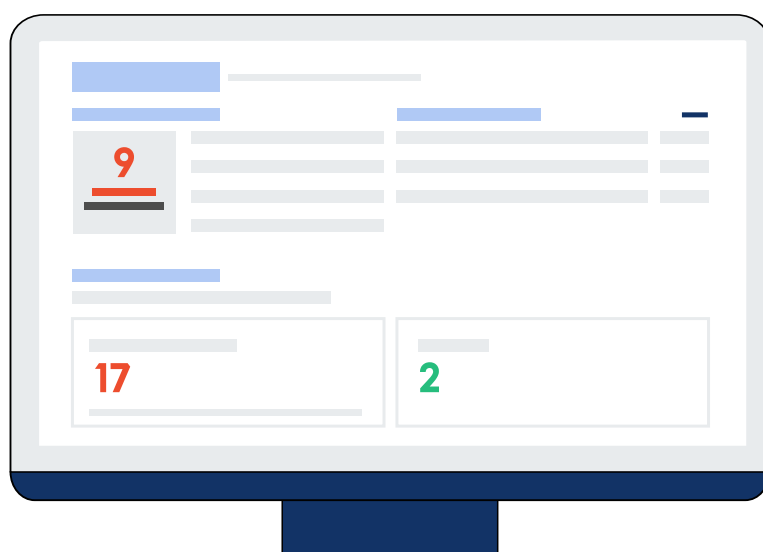

Seller Penalty Points

Our Seller Penalty Points System acts as a crucial deterrent against IPR infringement among sellers, effectively discouraging repeat violations within our platform.

Shopee issues penalty points for seller violations, including IP infringements, counterfeits, spam and prohibited listings. Penalty points accrue for various violations, including IP infringements, leading to a progressive loss of privileges for sellers that increase in severity. This escalation culminates in the suspension of a seller's account upon reaching a predetermined threshold of penalty points.

We consistently refine our penalty point system to encourage sellers to uphold high quality standards, thereby ensuring a safer online shopping environment for all. Shopee's policy team strategically integrates key insights from other brand protection initiatives within Shopee's Brand Protection Partnership (BPP), to effectively assess the efficacy of our penalty point system in addressing IPR violations.

By taking decisive action against bad actors, this proactive measure effectively prevents the proliferation of counterfeit goods and unauthorized use of brands' IP, safeguarding consumer trust and brand reputation within our marketplace.

Brand Support and Partnership Against Bad Actors

SECTION 02

2.1 | Brand IP Portal

2.2 | Brand Protection Partnership (BPP) Program

2.3 | Online to Offline Program

SECTION 02

Brand Support and Partnership Against Bad Actors

Shopee remains dedicated to protecting brands' IP and fostering a secure marketplace for our users. Through close collaboration with our brand partners, we continue to provide robust support to uphold their IPR.

This unified effort also includes proactive engagement with law enforcement agencies to swiftly address any instances of infringement and hold bad actors accountable through enforcement measures.

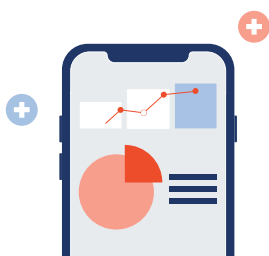

SECTION 2.1

Brand IP Portal

Shopee's Brand IP Portal serves as a one-stop platform to help Brands and IP owners to safeguard their IPR.

In 2023, we enhanced the Brand IP portal using invaluable feedback from its initial users and extended its benefits and features to all rights holders.

In 2024, we will deploy a reporting channel specifically to streamline addressing instances of brand misuse and help address impersonation. We will also increase the case reporting limit for improved efficiency and further develop the dashboard to offer more optimized insights and facilitate better monitoring for brand owners.

Improving the Utility of Insights

Delivering streamlined access to IP protection data via a dedicated Data Dashboard, empowering brand owners with actionable insights for informed strategy decisions.

Fortifying Functionality

Introducing localized support featuring access to various language options customized for local users.

Revamping the Portal's Homepage with comprehensive instructions and FAQs to address common user queries.

The new Data Dashboard empowers users with the ability to:

- 1 Track case and listing statuses in real-time across all markets for each brand.
- 2 Improve visibility for multi-brand principals to assess resource allocation efficiency across various brands.
- 3 Simplify monitoring of approval rates at both the case and listing levels.

In 2023, the Portal saw a
**100-fold increase
in new users**

Across markets, the number of IPs
successfully registered on the Portal
exceeded 100,000

One of the key improvements and highlights is Shopee's IPP portal. Since the IPP portal was launched, the takedown procedure of counterfeit goods has become more efficient. The user interface on the portal is well-organized and user-friendly, allowing brand owners to submit reports for multiple countries.

We are also pleased that Shopee's brand protection team continually supports us in addressing teething issues which is common when a new program is rolled out. We look forward to Shopee's continuing investments in supporting brand protection initiatives to enable strong cooperation and partnership with brand owners.

SECTION 2.2

Brand Protection Partnership (BPP) Program

Distributing counterfeit goods is a crime that requires swift action. To tackle this issue effectively, we must work closely with our network of stakeholders, including public and private sectors, retail, and government bodies. By joining forces, we can fight counterfeiters and safeguard the rights of IP holders, brands, and consumers from their illicit activities.

In May 2023, Shopee introduced the Shopee Brand Protection Partnership (BPP) program with 13 leading brands across various categories. The invite-only program offers enhanced IPR protection services, aiming to empower brands and rights holders to safeguard their products and IP better.

For BPP members, Shopee is dedicated to maintaining a service level of

under 5 days

surpassing our standard commitment of 8 days

In 2023, Shopee achieved a median service level of

1.5 days

for BPP members in promptly addressing reported infringements

We are committed to holding counterfeiters accountable, which is why we have launched a pilot for BPP members, introducing an improved repeat offender policy. This ensures wrongdoers are held responsible, safeguarding our partners' brand reputation.

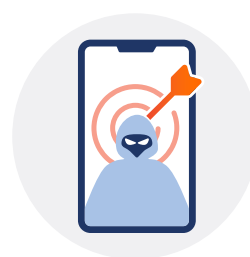

We strengthened our repeat offender policy by implementing the following measures:

Eliminating restrictions on the accumulation of valid IPR violation penalty points that sellers may accrue weekly

Expediting the permanent suspension of repeat offenders

Targeting sellers identified as bad actors based on a significant volume of listings suspected to be counterfeit

With the implementation of this enhanced policy, the number of repeat offender accounts frozen in 2023 for BPP members surpassed that of the previous year by **over threefold**. Additionally, there was a significant **40% decrease** in the number of repeat offenders identified in Q4 compared to Q1 2023, demonstrating the policy's effectiveness in deterring repeated violations and promoting compliance with Shopee's platform guidelines.

Insights gleaned from our BPP pilot are shared with our policy team to inform the assessment of the efficacy of our seller penalty points system in addressing IPR violations.

Our continuous efforts to improve our robust repeat offender policy ensures accountability by swiftly identifying and penalizing bad actors. This proactive approach serves to deter future violations and uphold the integrity of our platform.

Collaborating with BPP members, Shopee works to enhance the program, share best practices, identify trends, pilot new capabilities, and ultimately strengthen brand and customer protection. Below, we spotlight a selection of initiatives from these partnerships.

CASE STUDIES

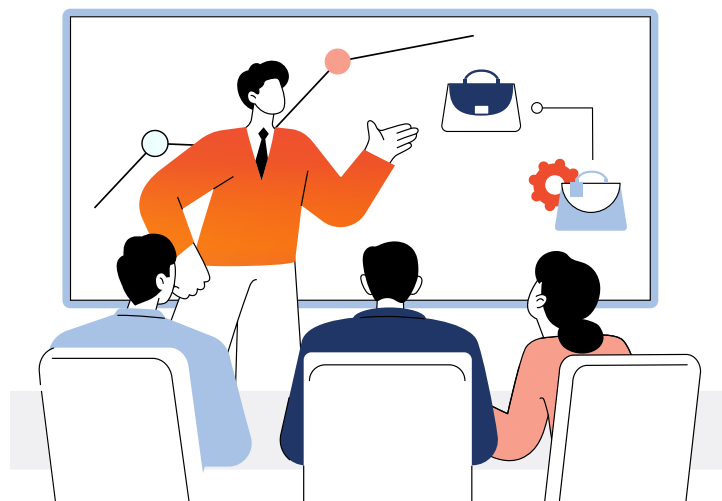

Tackling IP violations with ecosystem alliances

Recognizing the importance of ecosystem partnerships in fortifying IP protection, we held discussions with BPP member **P&G and INTERPOL Singapore** in August 2023 to explore potential collaborative efforts in combating IP theft and consumer protection.

We visited the **Ministry of Domestic Trade and Cost of Living (MDTCL)** with P&G in Malaysia in January 2024 to advance talks around counterfeit consumer goods, resulting in the establishment of an information sharing channel and joint efforts to raise consumer awareness of brand protection.

P&G commends Shopee's efforts to proactively address IPR infringements. We were pleased to be invited to join Shopee's new Brand Protection Partnership (BPP) program, which has already delivered promising results.

The Shopee team is a trusted partner, and we look forward to continuing our collaboration to protect our brands and consumers online.

Senior Legal Counsel Brand Protection APAC
Procter and Gamble

SECTION 2.3

Online-to-Offline (O2O) Program

We launched our pilot Online-to-Offline (O2O) Program in 2022 as a strategic move to reinforce our partnerships and enhance collaboration with law enforcement agencies globally, aimed at combating the spread of counterfeit products within our marketplace. This collective endeavor not only acts as a deterrent to potential bad actors but also demonstrates our commitment to safeguarding IPR through tangible, real-world actions.

In 2023, Shopee intensified its collaboration with BPP members, empowering us to conduct thorough investigations into nearly 200 sellers through the program. This encompassed extensive collaborative efforts, including robust intelligence sharing, comprehensive analysis of seller networks, and coordinated visits to law enforcement agencies. Through these efforts, Shopee actively pursued over 50 O2O targets across Southeast Asia, underscoring our steadfast dedication to fostering a secure and compliant marketplace.

How It Works

Identification

1

Shopee works with rights holders to identify sellers of counterfeits on the platform.

Consultation

To empower rights holders to effectively combat infringing sellers, Shopee will advise on the feasibility of offline enforcement, considering factors such as the scale of the shop and the reliability of available intelligence.

2

Deliberation

3

Once committed to taking offline action, Shopee will engage in discussions with the brand to align on an enforcement strategy agencies, to support the investigation process.

Investigation

Rights holders will take the lead in conducting offline investigations to gather intelligence on the origins of counterfeit products. Shopee may accompany them during site visits, in coordination with law enforcement agencies, to support the investigation process.

4

Offline action

After authorities conduct raids and seize counterfeit goods from physical premises, Shopee will partner with the brand to share the investigation's results.

5

CASE STUDY

Battling counterfeits at the source

**Taiwan**

In June 2023, we worked with **P&G and local law enforcement agencies in Taiwan** to execute a significant counterfeit seizure, leading to the successful interception of over 6,600 counterfeit skincare products valued at approximately \$1.4 million.

Industry Engagement and Community Education

SECTION 03

3.1 | Deepening Partnerships with Industry and IPR Groups

3.2 | Seller Education

3.3 | Customer Protection

SECTION 03

Industry Engagement and Community Education

At Shopee, fostering strong collaboration with stakeholders across private and public sectors is paramount in our efforts to combat counterfeit products and bad actors. We also engage leading industry associations and nonprofit organizations to enhance our brand protection initiatives. Through sharing best practices, analyzing trends, and pioneering innovative solutions, we strive to create a safer online shopping environment, ultimately safeguarding both customers and brands.

SECTION 3.1

Deepening partnerships with industry and IPR Groups

Building upon the progress we made last year, we have intensified our efforts to uphold IPR and regulations. Through active dialogue with established partners, we continuously explore opportunities to elevate our collaborations, ensuring even greater effectiveness in protecting IPR.

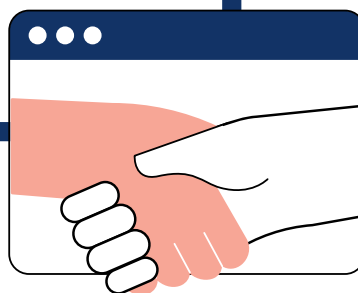

Pharmaceutical Security Institute (PSI)

Since the signing of the Memorandum of Understanding (MOU) with PSI in 2022, our concerted efforts have led to continual refinements in our collaborative data science model. By integrating image-matching techniques with expert human reviews by local listings teams, we have strengthened our ability to identify and eliminate illicit listings of drugs and prescription medication, mitigating potential risks.

Complementing these advancements, Shopee upholds a zero-tolerance policy towards such violations. Seller accounts linked to such listings are promptly suspended, in accordance with the terms outlined in the MOU.

In 2023, as part of our priority to protect public health, Shopee took proactive measures to successfully **remove over 1.8 million counterfeit and unlicensed pharmaceutical listings**.

In collaboration with PSI, Shopee identified and **suspended over 100,000 seller accounts**, successfully thwarting the entry of illicit pharmaceuticals into our marketplace.

PSI's working relationship with Shopee has proven to be exceptionally prolific, resulting in concrete actions that have significantly contributed to the protection of consumers and the pharmaceutical industry. Shopee's commitment to combating illicit online pharmaceutical sales is exemplary, and its proactive approach sets a high standard for other e-commerce platforms to follow.

Ramesh Raj Kishore

Regional Director - Asia Pacific Region

The Pharmaceutical Security Institute (PSI)

Shopee's dedication to protecting public health extends beyond the undertakings of the MOU. In markets where authorized programs permit the sale of prescription medicines in compliance with local regulations, we implement rigorous protocols for both sellers and buyers.

Sellers must undergo thorough verification and submit necessary documentation before listing items in the "Prescription Medicine" category. Prescription drugs are exclusively listed within this category, and consumers are required to provide photo proof of their prescriptions before they can make a purchase.

React

In the wake of signing the Memorandum of Understanding (MOU) with React in 2022, an interest group devoted to safeguarding brand owners against online IPR infringement, 95 members have been given priority access to our Brand IP Portal.

Additionally, during React's 2023 APAC Annual Meeting in Chiang Mai, we engaged in personalized, one-on-one discussions with members to delve deeper into their specific needs.

SBPNEWS

During the 2023 APAC Annual meeting, Shopee was also honored with an award for our targeted efforts against counterfeiting in Southeast Asia.

SECTION 3.1

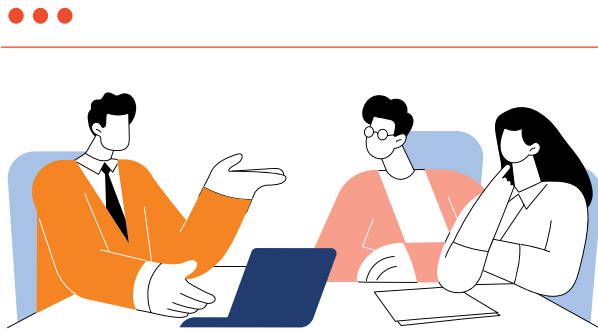

Engaging Industry Stakeholders

Shopee inaugurated its first Brand Protection sharing session during the annual Brands Summit, introducing key brand partners to our Brand Protection initiatives and outlining our focal points for the year

Shopee held in-person and virtual meetings with over 100 companies from the **Japan External Trade Organization (JETRO)** in Singapore and has since fostered close collaboration with them and several Japanese brands

Feb 2023

Mar 2023

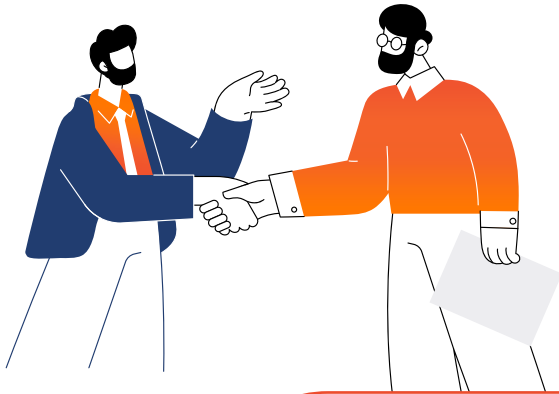

In April 2023, Shopee participated in the **International Anti-Counterfeiting Coalition (IACC)** conference in Nashville and actively engaged with members through two roundtable discussions

Apr 2023

Shopee attended the Anticounterfeiting Committee workshop hosted by the **International Trademark Association (INTA)**

May 2023

May 2023

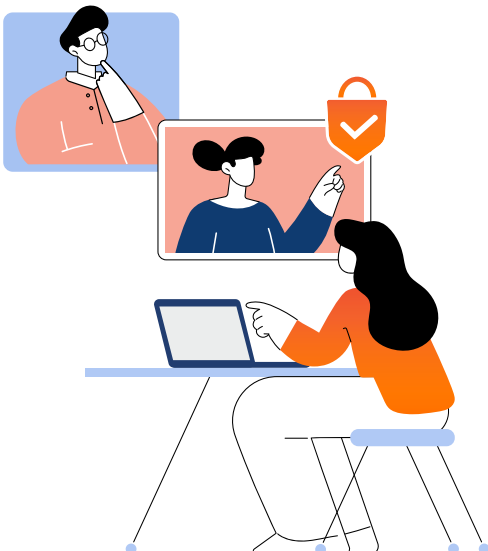

Shopee partnered with the **Pharmaceutical Security Institute (PSI)** to launch the **E-commerce Alliance for a Socially Responsible Ecosystem (ECARE)**, aimed at cultivating a cooperative relationship with authorities to combat the sale of counterfeit and diverted pharmaceuticals. Within ECARE, PSI introduced a simplified process flow to guide brands and marketplaces in successfully pursuing online-to-offline (O2O) cases

May 2023

Shopee held a virtual meeting with over 30 German **Anti-Counterfeiting Association (APM)** members

May 2023

Shopee unveiled the **Brand Protection Partnership (BPP) program** in Singapore, showcasing our dedication to empowering brands and rights holders in safeguarding their products and IPR

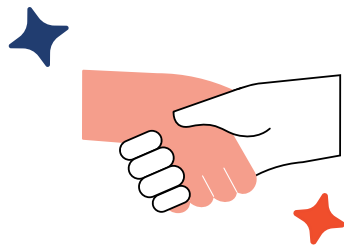

July 2023

Shopee held a virtual meeting with over 50 **Quality Brands Protection Committee (QBPC)** members

Shopee met with the **Korea Intellectual Property Protection Agency (KOIPA)** to discuss the next steps for collaboration under the existing Memorandum of Understanding (MOU)

Sept 2023

Shopee engaged with **Pharmaceutical Security Institute (PSI)** members during their 2023 APAC Regional Meeting in Danang, providing an update on the proactive collaboration results since the MOU signing

Oct 2023

Nov 2023

Shopee attended the **REACT-ASIA Annual Meeting 2023** in Chiang Mai and attended a roundtable

Nov 2023

Shopee participated in a panel discussion hosted by the U.S. Embassy at the 7th meeting of the **Intellectual Property Crimes Enforcement Network (IPCEN)** in Bangkok

SECTION 3.2

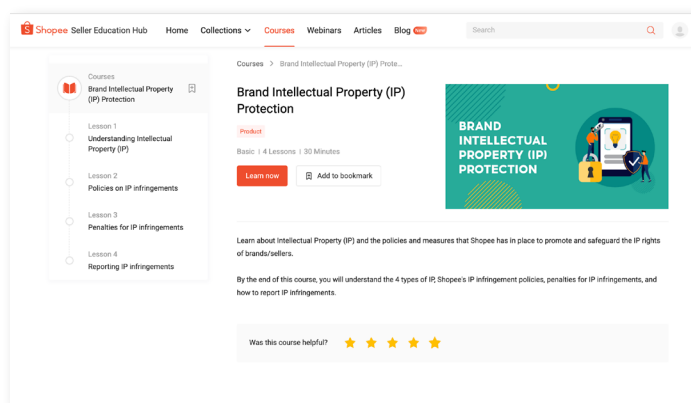

Seller Education

Recognizing the critical role of our seller community in combating the pervasive issue of counterfeits and IP infringement, we intensified engagement throughout 2023. Our concerted efforts have centered on fostering a culture of responsible selling, with a strong emphasis on adherence to IP laws and regulations. These include the rollout of additional resources designed to empower sellers to recognize, respect, and safeguard the IPR of brands.

Improvements to Seller Education Hub:

1 New Course on IP

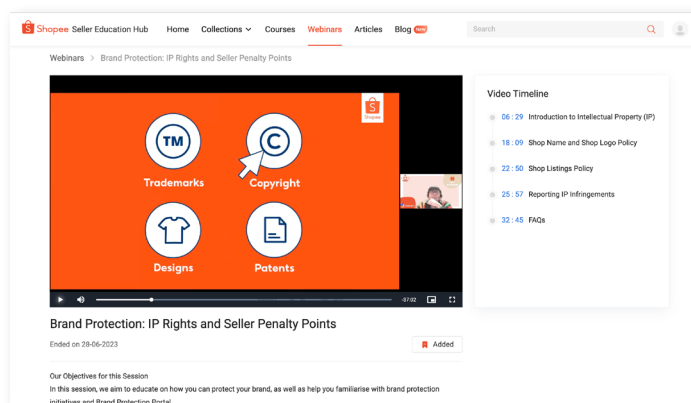

To reinforce our policies and sellers' responsibilities, we introduced a comprehensive four-lesson plan on IP to our Seller Education Hub in May 2023.

2 IP Webinar

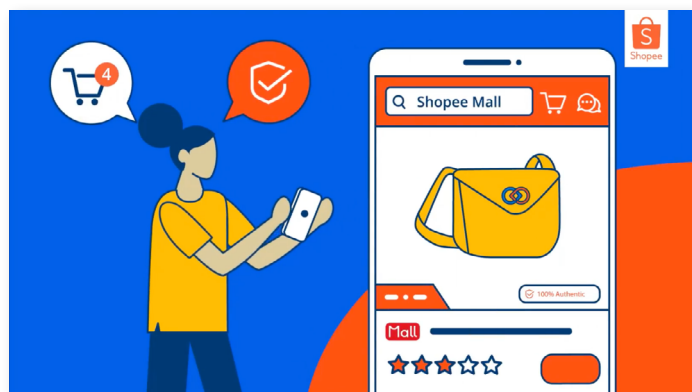

In 2023, we conducted live webinars in Malaysia, Vietnam, the Philippines, and Singapore as part of our education initiatives for sellers who received reports of IP infringements.

In Taiwan, we collaborated with local law firms to deliver comprehensive IP classes to our seller communities, equipping them with valuable knowledge and understanding of IPR and regulations.

3 Brand Protection Video

To improve public awareness on IP and the risks posed by counterfeits, we created an educational video outlining our platform policies and best practices for IP protection. Localized into seven languages, the video was launched across our markets through targeted social media campaigns in May 2023.

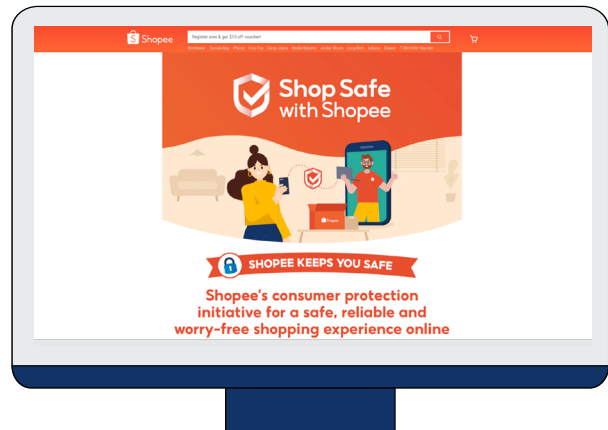

SECTION 3.3

Customer Protection

Shop Safe with Shopee

Expanding on existing initiatives to cultivate a safe and reliable marketplace environment, we introduced Shop Safe with Shopee in 2023. This consumer protection initiative aims to safeguard our customers against scams, fraud, and counterfeits through educational campaigns and activations, ensuring a secure and worry-free online shopping experience.

How we keep consumers safe:

Shopee Guarantee
ensures consumers receive their item or are otherwise provided a refund

Shopee Mall
ensures that products are 100% authentic

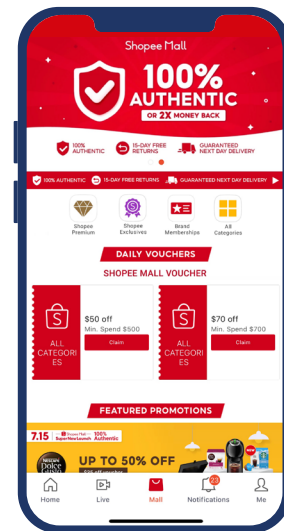

Easy Returns & Refunds
for a worry-free shopping experience

Shopee Mall

Shopee Mall stands as an invitation-only premium retail space reserved for brand owners and authorized distributors. With a curated selection of verified sellers, Shopee Mall guarantees the authenticity of all items purchased, as each seller is subject to a verification process that assesses the credentials of their products. This commitment to quality empowers customers to transact with a peace of mind, knowing that they are accessing products that are guaranteed to be 100% authentic.

By providing buyer confidence and incentivizing seller compliance with IP laws, Shop Safe contributes to overall IP protection by discouraging counterfeit sales and promoting genuine transactions.

With e-commerce becoming an intrinsic part of our everyday lives, safety has become the benchmark for Singaporean shoppers. Shop Safe with Shopee builds

on our commitment to cultivate a safe and reliable e-marketplace environment where shoppers and sellers alike can transact with peace of mind.

Ian Ho
Vice President
Shopee

Looking Ahead

Looking Ahead

Striving to deliver the best shopping experience for sellers and consumers, we remain committed to strengthening our brand protection strategy by refining safeguards with new technologies, supporting rights holders with critical tools and undertaking partnerships with industry stakeholders.

In the year ahead, our focus will be on:

Leveraging technology to strengthen our in-app proactive safeguards

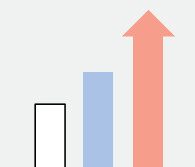

Deepening ecosystem engagement through our programs (O2O), industry alliances, and collaboration with law enforcement

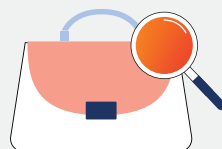

Enhancing accessibility and enriching the features of our Brand IP Portal

Expanding our own Shopee Brand Protection Team to further fortify our strong foundation in brand protection

Growing our Brand Protection Partnership (BPP) program, and to encompass more brand partners

Broadening avenues for infringement prevention with the pilot of our Test Purchase program

Advancing IP protection outreach and discussions with brand partners in Latin America, while extending safeguards such as the Smart Identification System to local BPP brands in Brazil

● ● ● Test Purchase Program

In 2024, we are excited to introduce the pilot phase of our Test Purchase program. This initiative is designed to verify and align product specifications with official brand items, initially focusing on counterfeit goods that may pose health and safety risks to consumers.

● ● ●

We will enforce stricter penalties for sellers engaged in counterfeit sales that compromise consumer well-being. We also plan to conduct more proactive investigations, and collaborate closely with participating brands on their offline investigations.

We are committed to strengthening our collaboration with trademark registration authorities globally, and expanding joint efforts with the private sector to develop and scale protection measures against IP infringement.

Additionally, we will continue to fortify our platform and ecosystem, ensuring that our customers, sellers, and brand partners feel confident and secure when using our services.

Shopee

**BRAND
PROTECTION**
