A Message To Our Partners

I am proud to present the fourth edition of Shopee's Brand Protection Annual Report. In 2025, we further developed our intellectual property safeguards and expanded our collaborations with partners across different markets, to foster a secure and trusted online marketplace for all.

Brand protection is a team effort involving stakeholders across the entire ecosystem, working together to ensure that intellectual property is respected and protected. Together, with industry associations and enforcement authorities, we continue to strengthen the integrity of our marketplace while supporting the growth of legitimate businesses on our platform.

As digital commerce continues to evolve, safeguarding intellectual property goes beyond reactive measures, requiring proactive systems and strong partnerships.

This has led us to focus on four key areas over the past year:

- 1 **Delivering faster notice-and-takedowns on our Brand IP Portal**
- 2 **Enhancing proactive detection with Artificial Intelligence (AI) through our Smart Identification System (SIS)**
- 3 **Tackling repeat offenders and safeguarding account integrity**
- 4 **Strengthening collaboration with rights holders and enforcement bodies**

Enhancing our Brand IP Portal and expanding our SIS coverage has enabled more efficient detection and removal of counterfeit listings. To provide faster resolutions on IP rights violations, we have fortified our Know Your Customer (KYC) processes and seller accountability frameworks. We have also bolstered our enforcement efforts across online and offline channels, strengthening our deterrence measures.

Building on our current efforts, we will continue to advance our capabilities in 2026, refining our tools and deepening collaboration across the ecosystem.

We extend our sincere appreciation to all our partners for their continued support and collaboration. Looking ahead, Shopee will continue to strengthen platform security, uphold transparency and work with our partners to build a digital marketplace where trust, innovation and responsible commerce can thrive.

Ian Ho
Vice President
Shopee

Our Brand Protection Team & Priorities

Shopee remains dedicated to continuously reinforcing its brand protection initiatives to safeguard brands and the trust they place in our platform. Through **strengthened enforcement measures and policies**, as well as **close collaboration with rights holders**, we strive to protect intellectual property and maintain a secure online marketplace.

Headquartered in Singapore, Shopee's Brand Protection Team works closely with rights holders, enforcement authorities, and industry stakeholders to enhance policies, improve detection capabilities, and take firm action against infringements. This effort is supported by more than 100 operations and legal professionals across our markets, enabling effective and scalable enforcement.

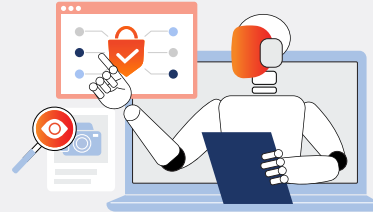

1

Delivering Speed & Transparency for IP Rights Holders

Ensuring prompt and effective takedown of infringing listings

2

Pre-emptive Protection Powered by Advanced AI

Enhanced our Smart Identification System to fight back against ever-improving evasion tactics

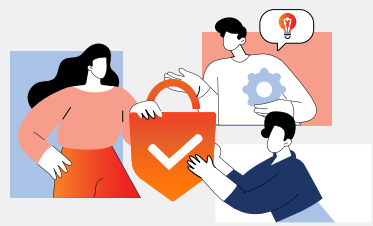

3

Tackling Repeat Offenders & Maintaining Account Integrity

Proactively disrupting bad actors and dismantling counterfeit networks

4

Strengthening Industry Collaboration & Engagement

Working hand-in-hand with our partners on joint enforcement

With these 4 key pillars of brand protection, Shopee is working to stay ahead of evolving threats and build a safer, more transparent, and trusted e-commerce environment for both brands and consumers alike.

SECTION 01

Delivering Speed, Transparency & Oversight for IP Rights Holders

SECTION 01

Delivering Speed, Transparency & Oversight for IP Rights Holders

Shopee currently has a robust Brand IP Portal to provide rights holders with an effective avenue to report and take down infringing listings.

In 2025

the Brand IP Portal was further rolled out to all new markets, totalling

15,614
Registered Brands
(47.7% YoY growth)

48,432
IP Registrations
(22.7% YoY growth)

At the same time, Shopee improved our response time to

1.6 days
(41.8% YoY improvement)

ensuring rapid enforcement and limiting consumer exposure to infringing listings.

Over the year, Shopee processed IPR case reports wherein

91%
cases

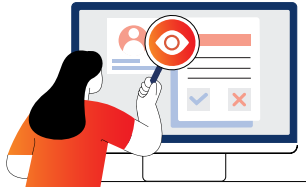

were successful removal of infringing listings

96.6%
cases

were taken down before any sale

This highlights our dedication to prompt and effective intellectual property enforcement, as well as to maintaining platform integrity.

Through ongoing collaboration with rights holders and enforcement authorities, we have made significant improvements to the **Brand IP Portal**, enhancing its accessibility, efficiency, and overall user experience:

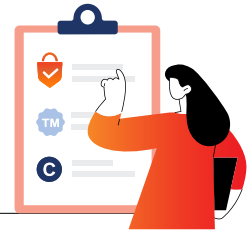

Enhanced Case Transparency

The launch of the pilot Appeal feature allows rights holders to view and manage direct seller appeals.

Expanded IP Registration Types

Shopee's Brand IP Portal now accepts WIPO trademark certificates and copyright declarations. We have also created new fields for authors and ISBN holders to register their IP, making it easier for diverse rights holders to protect their assets.

Automated Error Reporting for Link Submissions

By providing immediate feedback on invalid link submissions, users can resolve issues independently.

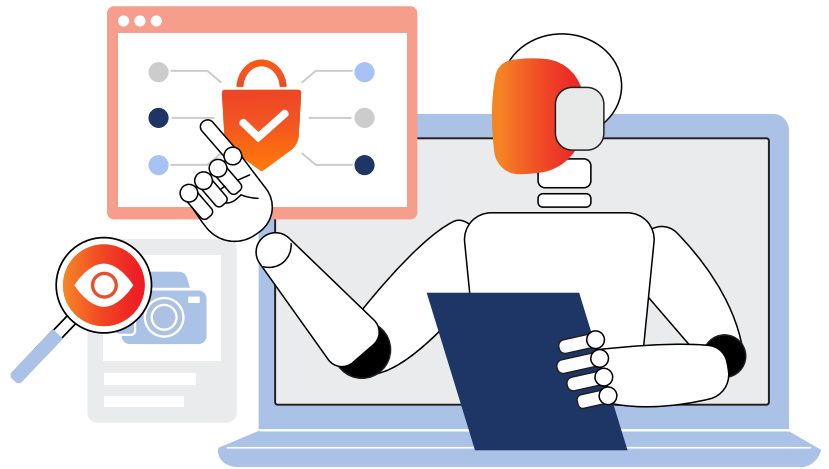

The Korea Intellectual Property Protection Agency (KOIPA) extends its sincere gratitude to Shopee for its continued efforts in protecting intellectual property (IP) rights. Shopee has improved the IP protection environment on its platform by enhancing the Brand IP Portal and reducing the processing time for reports. These improvements have enabled Korean companies to conduct business on the Shopee platform with greater confidence.

With the renewal of the Memorandum of Understanding (MOU) in June 2025, KOIPA and Shopee have expanded their scope of cooperation to include a rapid response system for counterfeit products, integrated online-offline monitoring, and IP protection education. As a specialized agency dedicated to protecting the IP rights of Korean companies, KOIPA looks forward to continued collaboration with Shopee.

SECTION 02

Proactive Protection Powered by Advanced AI

2.1 | Our Smart Identification System (SIS):
Evolving Proactive IP Protection

SECTION 02

Proactive Protection Powered by Advanced AI

Shopee continues to proactively implement Brand Protection, detecting and removing infringing listings before they reach markets. This is anchored by our **Smart Identification System (SIS)**, which was launched in 2022 and has continuously evolved to stay ahead of ever-changing seller evasion tactics.

Expanding beyond high-risk prohibited categories, SIS has progressively expanded into brand-specific detection models across high-volume commercial categories including fashion, beauty, electronics and fast-moving consumer goods (FMCG). The SIS model is now powered by large language models (LLM), equipping it with self-learning capabilities that allow us to capture evolving seller circumvention behaviors and proactively detect more infringing products than before.

Early implementation of SIS in cross-border markets such as Argentina and Mexico, ensures proactive IP enforcement is built into our platform from the outset.

In 2025, we rolled out

SIS v3

focusing on performance improvements.

In 2026, we will expand our SIS coverage to

121 brand-specific models

(up from 78 in 2024)

This growth represents an almost

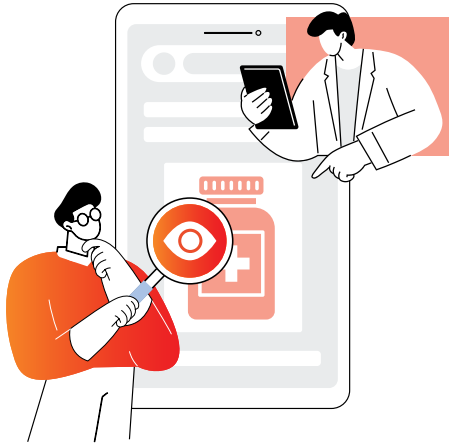

60% YoY increase

reflecting our continued progress in enhancing the scale of our proactive enforcement efforts.

SECTION 2.1

Our Smart Identification System (SIS): Evolving Proactive IP Protection

Shopee's SIS remains a key role in our proactive enforcement efforts. Since its introduction, SIS has expanded significantly in both scope and effectiveness:

...

2022

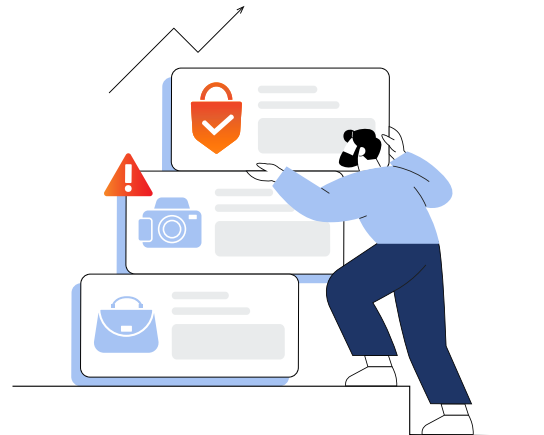

Launched the SIS pilot in partnership with the Pharmaceutical Security Institute, focusing on listings involving prohibited and prescription drugs.

...

2023

Introduced brand-specific SIS models, prioritizing brands with frequent infringement reports and heightened safety concerns.

...

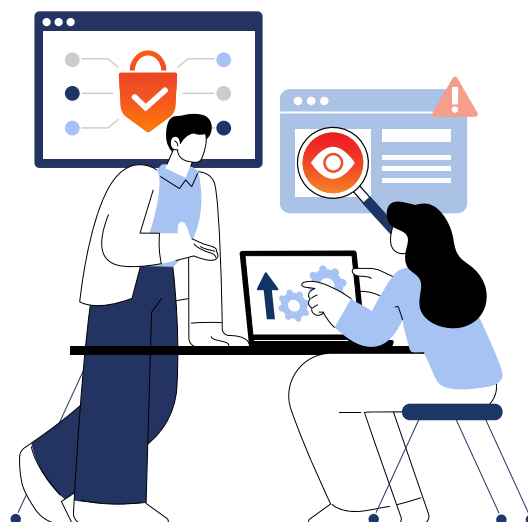

...

2024

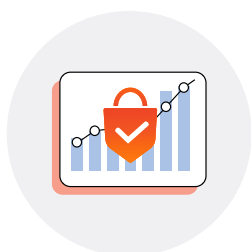

Scaled SIS further to include brands with the highest volume of IPR reports, increasing coverage from 24 to 78 brands across key categories such as fashion, beauty, electronics, and FMCG.

2025

Upgraded SIS to a LLM-powered framework with self-learning capabilities and expanded its coverage to all markets, significantly strengthening our ability to detect evolving seller evasion tactics.

In 2025, Shopee proactively removed over 52 million listings, which represents:

Nearly 8x increase

from 2024 (6.1 million), reflecting the significant uplift in detection scale and precision following our SIS v3 upgrade.

Over 99% listings

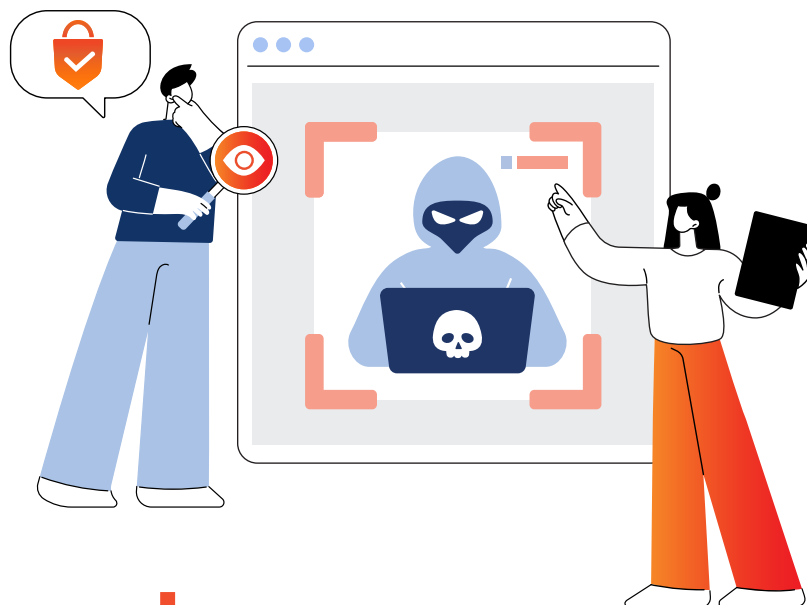

detected through SIS were removed before any sales occurred, substantially reducing consumer exposure to counterfeit goods and reinforcing the effectiveness of our proactive enforcement framework.

SECTION 03

Tackling Repeat Offenders & Account Integrity

3.1 | Enhanced Repeat Offender Policy

3.2 | Stringent Seller KYC

SECTION 03

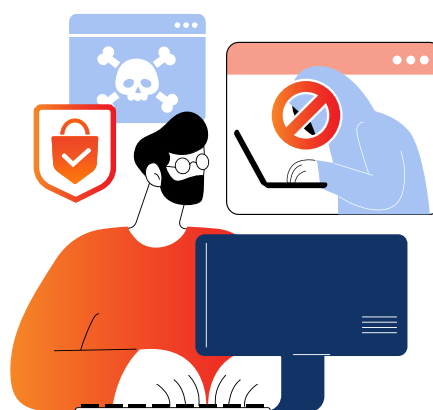

Tackling Repeat Offenders & Account Integrity

SECTION 3.1

Enhanced Repeat Offender Policy

In 2025, we launched a strengthened Repeat Offender Policy across our markets in Southeast Asia and Latin America, which enables swift and decisive action against violators. This includes escalated penalties and stricter enforcement thresholds.

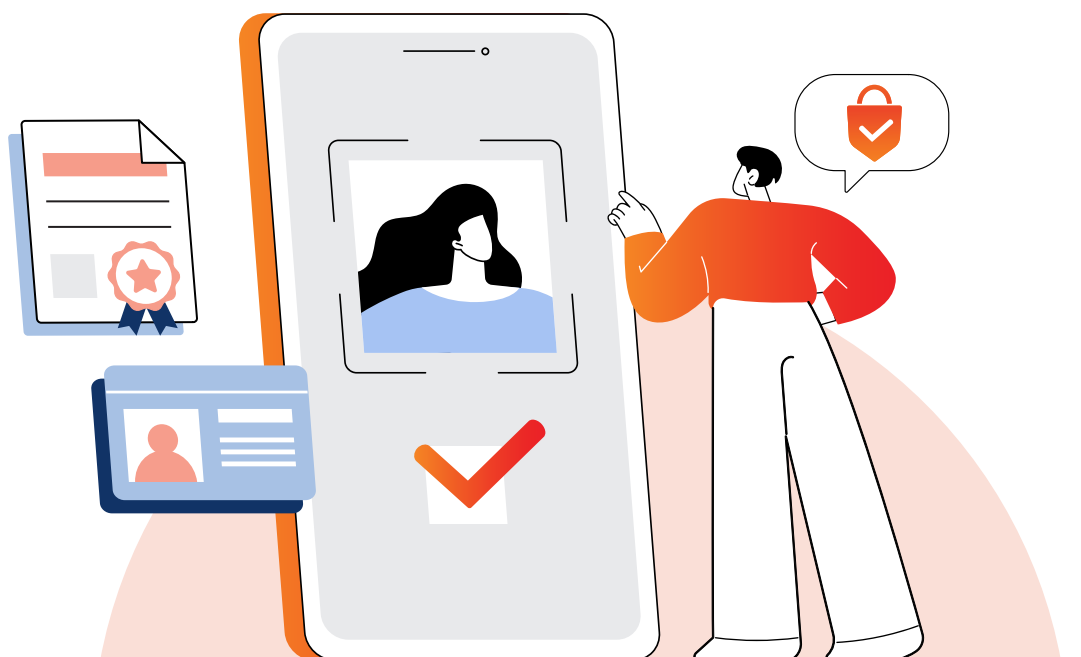

By systematically targeting repeat infringers, we uphold our zero-tolerance stance on counterfeit activity and safeguard the integrity of our marketplace.

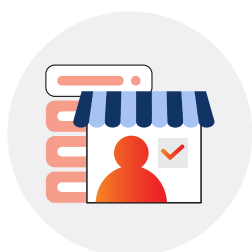

Over **60,000 sellers** were suspended for IP violations in 2025 — an increase of **more than 30 times** compared to the previous year. This sharp rise reflects the effectiveness of our strengthened Repeat Offender Policy and our enhanced detection capabilities in disrupting repeat infringers at scale.

SECTION 3.2

Stringent Seller KYC

We continue to **strengthen our seller KYC processes** by requiring sellers to provide valid IDs or business licenses.

In markets where **national ID systems and government databases** are available, such as Singapore and Taiwan, Shopee taps into these databases to verify sellers.

In other markets, Shopee conducts a **liveness check**, requiring sellers to submit a photograph of themselves holding their ID.

Measures like these help ensure greater accountability on the platform and support a safer, more trusted marketplace for buyers, sellers, and brand partners.

SECTION 04

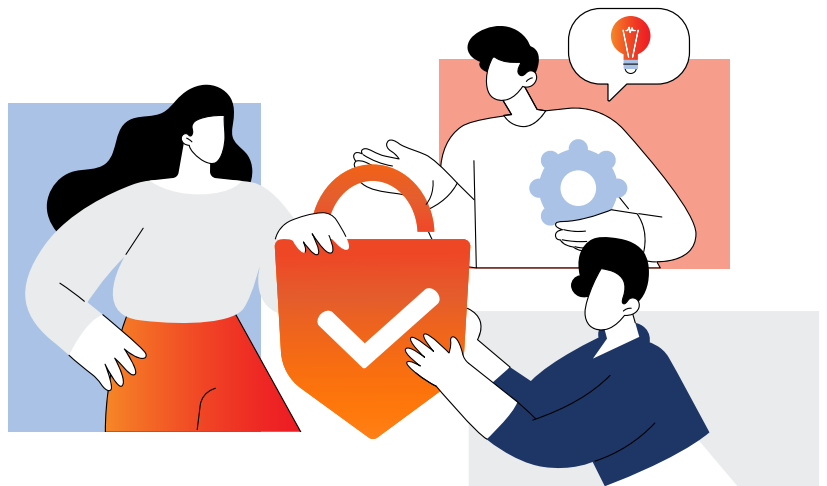

Strengthening Industry Collaboration & Engagement

4.1 | Test Purchase Program

4.2 | Online-to-Offline (O2O) Partnerships with Brands

4.3 | Deepening Industry Partnerships

4.4 | Engaging Industry Stakeholders

SECTION 04

Strengthening Industry Collaboration & Engagement

Collaboration and education remain at the core of Shopee's brand protection strategy. In 2025, Shopee accelerated industry engagement, working closely with brands, associations, enforcement agencies, and other key stakeholders to build a secure and reliable online marketplace.

In addition, our quarterly newsletter and annual report provides our industry partners with timely updates on improvements to our proactive and reactive brand protection measures.

SECTION 4.1

Test Purchase Program

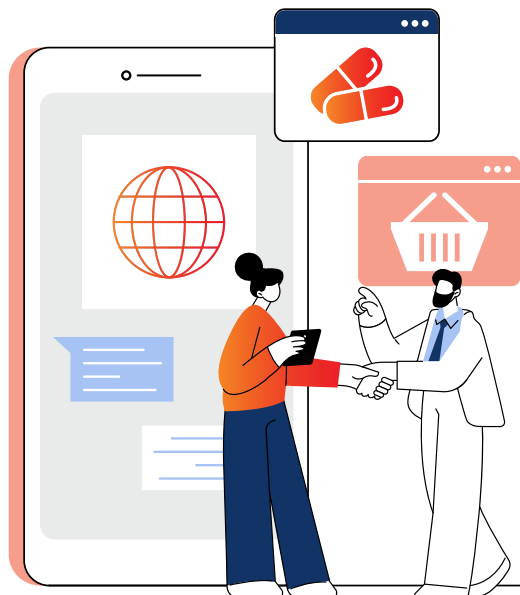

Shopee launched the **Test Purchase Program** focused on mitigating health and safety risks by verifying and gathering evidence on counterfeit items.

In 2025, we worked with **9 principal brands**, which generated **24 leads** that gave us more information on suspected counterfeit activity. We actively collaborate with our brand partners and enforcement agencies to tackle issues of suspected sellers selling counterfeit products.

SECTION 4.2

Online-to-Offline (O2O) Partnerships with Brands

Shopee is dedicated to working with rights holders to expand enforcement efforts beyond the **online space into offline channels**.

In the past year, we supported multiple brand owners in **investigating over 250 sellers** across sectors, including pharmaceuticals and FMCG. Through our Online-to-Offline (O2O) pilot program, these collaborative initiatives resulted in successful offline enforcement operations, demonstrating our ongoing commitment to tackling counterfeit activities both online and offline.

“

Panasonic deeply values Shopee's proactive approach to brand protection and its commitment to working alongside brand owners. **Collaboration between the brand owners and e-commerce platforms is essential** in addressing the issue of counterfeits.

We sincerely appreciate the ongoing partnership with Shopee, which has enabled us to take meaningful steps toward a marketplace without counterfeits. We look forward to continuing our joint efforts to achieve our shared goal of a safe and reliable environment for consumers and brand owners alike.

Panasonic | Panasonic

“

At REACT, we are pleased to recognize Shopee's continued commitment to brand protection and consumer safety across various countries. Over the past year, Shopee has demonstrated a proactive and collaborative approach in refining its brand protection strategies, particularly through its KYC process and Enhanced Repeat Offender policy.

REACT would like to especially call out the strong support and collaboration by the world-class Shopee brand protection team with REACT and rights holders, not just in Online to Offline investigations projects but also in being fast, responsive and cooperative with a genuine interest to protect consumers from fakes and scams. We look forward to deepening our collaboration and building on these shared successes.

CASE STUDIES

React & 5 FMCG Brands

React

Together with our MoU partner, React, we deployed a multi-brand effort to curb the sale of counterfeit consumer health and personal care products on the platform. After being alerted by React, Shopee reviewed the reported account and identified a high-value target in the Philippines engaged in counterfeit activity.

Leveraging Shopee's findings, React was able to conduct a raid on the counterfeit sellers identified, seizing over

5,800 counterfeit units

This case demonstrates the effectiveness of collaboration between platforms, brands, and enforcement agencies, in detecting and addressing counterfeit operations both on the platform and offline.

Shopee was recognized for its efforts with an **award at the React Asia Annual Meeting.**

SECTION 4.3

Deepening Industry Partnerships

Shopee has continually focused on building deeper relationships with our industry stakeholders such as brand owners, associations, enforcement agencies, and other key stakeholders to find more ways to collaborate to protect brand rights. Through mutual collaboration and learning, these partnerships play a vital role in enhancing overall enforcement protocols on Shopee.

As a result of these initiatives, Shopee has received recognition from leading organizations—including the Pharmaceutical Security Institute—for our sustained commitment to elevating industry-wide standards in brand protection. While we continue to upgrade our initiatives and programs, we maintain a high level of transparency with brands through our quarterly newsletter and annual report.

“

*The collaboration between PSI and Shopee through the SIS program has been a constructive step in addressing the online sale of prohibited and prescription medicines. The initiative reflects **Shopee's willingness to engage with industry and strengthen platform governance**, which ultimately contributes to improving consumer safety in the digital marketplace.*

**Ramesh Raj Kishore**

Regional Director - Asia Pacific Region
The Pharmaceutical Security Institute

SECTION 4.4

Engaging Industry Stakeholders

Shopee also increased its engagement with key industry associations, including INTA, IACC, REACT, AAFA, Unifab, Elipe, CropLife, KOIPA, PSI, ABPG and others. These engagements centered around increasing awareness of Shopee’s brand protection tools and enforcement processes, drawing on industry best practices, and offering members a direct escalation channel to facilitate faster and more effective collaboration.

Additionally, Shopee actively participated in both global and regional brand protection and anti-counterfeiting conferences, championing stronger intellectual property rights (IPR) protection policies.

Shopee spoke at the **Marqvision webinar**, sharing key insights on strengthening beauty brand protection.

Shopee hosted its third **Brand Protection Sharing Session**, bringing together key brand partners to present our latest initiatives and outline strategic priorities for the year ahead.

Feb 2025

Mar 2025

Shopee participated in two major global IP protection events: the **International Anti-Counterfeiting Coalition (IACC) Annual Conference** and the **International Trademark Association (INTA) Annual Conference**, both held in San Diego.

At the IACC Conference, Shopee officially joined the **Marketplace Advisory Council (MAC)**, reinforcing our commitment to the industry.

May 2025

Shopee signed a renewed Memorandum of Understanding (MoU) with the **Korea Intellectual Property Protection Agency (KOIPA)**.

Jun
2025

Jul
2025

01

Together with Thailand's **Department of Intellectual Property (DIP)**, Shopee co-hosted a regional roundtable with other e-commerce platforms.

02

Shopee partnered with the **Intellectual Property Office of the Philippines (IPOPHL)** to host the IPOPHL IP Bootcamp.

03

Shopee spoke on a panel on "Collaboration Between Rightsholders and Intermediaries" at the first-ever ACE Anti-Piracy Summit hosted by the **Motion Picture Association (MPA)** and the **Alliance for Creativity and Entertainment (ACE)**.

Aug
2025

Shopee attended the **IP Week @ SG** organized by the Intellectual Property Office of Singapore.

01

Shopee attended the second **IACC Marketplace Advisory Council Meeting** in Washington, D.C., meeting several industry associations.

Sep
2025

02

Shopee spoke at the PSI x BPOM Workshop held by the **Indonesian Food and Drug Authority (BPOM)** and the **Pharmaceutical Security Institute (PSI)**.

Oct
2025

01

Shopee spoke at the **OLAF-EUIPO Conference** co-organized by the **European Anti-Fraud Office (OLAF)** and the **EU Intellectual Property Office (EUIPO)**.

02

Shopee presented at the **Asia Security Conference & Exhibition**, speaking about anti-counterfeiting, illicit trade & brand protection.

03

Shopee was a panel speaker for the ABPG InsightOps™ Roundtable held by the **ASEAN Brand Protection Group (ABPG)**.

04

Shopee hosted the Shopee x IPOS x SG MFA Workshop held jointly by the **Intellectual Property Office of Singapore (IPOS)** and the **Ministry of Foreign Affairs (MFA)**.

Nov
2025

Shopee presented at the eCare Meeting organized by **Interpol**, and spoke on a panel at the **React Asia Annual Meeting**.

Dec
2025

Shopee was a speaker at the WTR Live: Brand Strategy Summit Asia 2025 held by the **World Trademark Review (WTR)**.

Looking Ahead: Next-Gen Safeguards

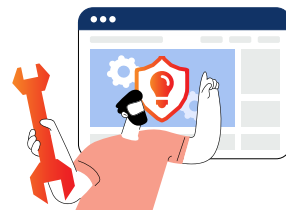

Looking ahead, Shopee remains dedicated to advancing our progress and further elevating our brand protection efforts.

In the coming year, our focus will be to build up 3 pillars of support for Brand Protection:

1 Enhancement to the IP Portal to improve user experience

Shopee is committed to continuously improving the Brand IP Portal and actively incorporating feedback from partners to better support rights holders in protecting their intellectual property. Based on the feedback gathered, we will be introducing several enhancements in 2026:

- A **centralized brand management feature** that provides our partners with greater control and visibility over who is authorized to protect their IP.
- A **proactive IP renewal feature** with a new **'Expired' status** to help users maintain uninterrupted protection. This enhancement provides clearer visibility into IP validity, enabling timely renewals before protections lapse.

2 Leveraging AI to evolve our Proactive Detection system

To counter increasingly sophisticated evasion tactics, Shopee will launch the fourth version of our **Smart Identification System (SIS)** in 2026, powered by a **fully automated multi-LLM framework**. Coverage will also be expanded to more brands, advancing behavior-based counterfeit identification at scale.

3 Growing our O2O Collaboration with key partners

Shopee proactively protects brands from IP infringement through strategic collaboration with rights holders, leveraging shared intelligence to drive more effective enforcement.

This enables targeted investigations into counterfeit sellers and supports the continued expansion of our **Shopee Test Purchase Program** to strengthen enforcement outcomes and uphold marketplace integrity.

Partner With Us!

Combating counterfeits requires a coordinated and collective approach. We welcome continued collaboration with brands, industry associations, and enforcement authorities to strengthen policies, enhance enforcement efforts, and foster a safer, more trusted marketplace for all stakeholders.
